SCALE FOR PROJECT AI-MODULE-0X1 (/PROJECTS/AI-MODULE-0X1)

Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the person (or the group) evaluated the eventual dysfunctions of the work. Take the time to discuss and debate the problems you have identified.
- You must consider that there might be some difference in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade him/her as honestly as possible. The pedagogy is valid only and only if peer-evaluation is conducted seriously.

Guidelines

The preliminaries are to know and apply before moving during the verification of each exercise.

Bonus

Evaluate the bonus part if, and only if, the mandatory part has been entirely and perfectly done. In case all the mandatory points were not passed during the defense, bonus points must be totally ignored.

Bonus

The person being assessed must be able to explain in a simple manner why there is a difference in results between this module and the previous one.

We remind you that this part is not mandatory and that if the person does not validate this point, it will not be a big deal at all!
